## LOCAL ITEMS

Mrs. A. E. Roberts was a Calgary visitor last week.

O. L. Mielke was a Calgary business visitor this week.

W. A. Hurley made a business trip to Hanna this morning.

Mrs. Ferguson and daughter left for Calgary Wednesday night.

We still have some good horses to sell. Call and see them at our barn. Huggard & Vanhook.

Miss Urdine Brownell was taken to Cereal hospital the first of the week for medical treatment.

Messrs N. D. Stewart and J. P. Watson went to Calgary the first of the week to attend a U. F. A. meeting.

Mrs. Fred. Otto was taken to the Cereal hospital the first of the week, where she is under the doctor's care.

Mr. and Mrs. H. E. Bradford and family, of New Bridgen, were visitors at the home of N. D. Stewart on Sunday.

Only one week to make entries for the annual plowing match under auspices of the Chinook and District Agricultural Society.

The Women's Institute will meet next month at the home of Mrs. Robinson. The roll call to be answered with hints on beautifying the town.

David Smith, of the bank staff at Delia, arrived home on Sunday and is spending a two weeks' vacation with his parents Mr. and Mrs. J. S. Smith.

E. M. Bliss, manager of the Central Creameries at Youngstown, passed through Chinook on Sunday morning enroute to Alask for a short visit.

Mr. Rideout has received notice from the postal department that Chilmark Post Office will be closed on June 1st, all mail for that office going to Rearville in future.

Mrs. Margaret Neff, of Granum, arrived in Chinook on Wednesday morning and intends spending the summer with her son and daughter-in-law, Mr. and Mrs. C. E. Neff.

Messrs Fred Hobson, John Forgie, August Carlson of this district and C. V. Johnson of Cereal went to Calgary Sunday morning. On Monday Messrs Hobson and Forgie purchased G. M. C. trucks and drove back to Chinook with them.

The Ladies' Card Club held their regular weekly meeting on Tuesday evening at the home of Mrs. Hurley. Mrs. Deman held the highest score of the evening, winning a dainty silver vase. The club will meet next week at the home of Mrs. W. S. Lee.

Mr. and Mrs. Powell and family who purchased and sold the farm formerly owned by J. C. Hess, returned to Chinook last week from California. They are visiting at the home of Wm. Powell, and are hoping to locate in the Chinook district permanently.

Mr. and Mrs. John Engler and two sons, John and Jacob, from Manitoba, are visiting friends in Chinook district this week. They are on a motoring trip through to the coast. Mr. Engler and family were old time residents in this district, having farmed just south of town.

## Heavy Rainfall Helps Crop

A rainfall that will prove of inestimable value to the farmers, visited this section last Sunday afternoon. The rain lasted for about half an hour and almost reached the proportions of a cloudburst, coming down so heavily that it was impossible for autoists who were caught out in the shower to be able to see to drive properly. Although it is reported that the storm did not extend far east and west, it extended for several miles north and south.

A test was made, shortly after the rain ceased, as to the depth it had soaked into the plowed land and it was found that it had gone deep enough to reach the original moisture in the ground.

It is just two weeks since this section was visited by a good shower, and all are optimistic of a good crop in this section of the province, as all grain is coming along in fine shape.

## Around World On Cycle

Jos. Louis de Fagni, of Montreal, who is attempting to circle the world on a Red Wing bicycle, arrived in Chinook on Monday. Mr. Fagni has already toured the principal centres of Mexico and the United States, and is now visiting the important centres of western Canada, on his way east, where he will take boat for Europe on his trip.

We are informed the cyclist is making this journey, which is to cover some 75,000 miles, on a wage, and is to accept no monetary assistance on his trip, but is not debarred from receiving help as far as meals and lodging are concerned. The management of the Acadia Hotel entertained him to meals and room and the cyclist started for Saskatoon Tuesday morning.

## Compiling Agricultural Statistics

Similar arrangements to those used in previous years have been made by the Dominion Bureau of Statistics and the Provincial Department of Agriculture for the collection and publication of the annual agricultural statistics for Alberta for 1928. These statistics will be based upon returns to be collected during the month of June from individual farmers upon cardboard schedules issued to them through the teachers and children of rural schools.

The schedule used is a very simple one, calling only for the areas sown to field crops and the number of farm animals alive on the farm in mid-June. Upon the resulting estimates of total areas sown are based the preliminary, provisional and final estimates of yield, which are of great importance in connection with the movement, financing, distribution and sale of the principal cereals, especially of wheat of which Canada is now the world's leading exporter.

In order that the statistics secured may be as accurate as possible, it is hoped that farmers in the province will not fail to render the small service required by filling in and returning the schedule issued. Any farmer who has not received a schedule card by the middle of June can secure this by writing the Publicity Commissioner, Department of Agriculture, Edmonton.

Matt Richardson, of Mantario, Sask., was calling on old friends in Chinook last Thursday. Mr. Richardson is well known here, having clerked in the Briggshaw store in the early days.

Let Us Celebrate

A year ago the people of Canada engaged with a very real enthusiasm in the celebration of Dominion Day, the Diamond Jubilee of Confederation. It was, of course, an especially memorable anniversary and for weeks and months many committees of public-spirited citizens spent long hours in planning and preparation for the notable ceremonies which marked the sixtieth anniversary of Canada's birth. The effect of that general observance of Dominion Day from sea to sea, and the carefully planned and well executed programmes, including educational and historical features of great value, was at once noticeable in the greater pride and renewed confidence in Canada and its future which was displayed by the Canadian people.

The year which has since elapsed has been a year of expansion and prosperity throughout the Dominion. Steadily, even rapidly, the Dominion of Canada has grown in national stature and in international importance. It has commanded, and continues to command, an ever increasing interest in other countries, while outstanding men and women in realms of government, education, finance, commerce and industry, not only in Canada, but throughout the world, have referred to this Dominion as among the most favored of all lands, and the one country above all others which today offers the greatest opportunities and the brightest promise for the future.

The Diamond Jubilee celebrations of a year ago helped to arouse and to stimulate the national consciousness of the Canadian people, and, because no country can be truly great lacking a national spirit and consciousness, the celebrations last year have more than repaid all the time, thought and money on them.

It is not sufficient, however, to the cultivation and growth of a national spirit and national aspirations that the birthday of a nation be widely and fittingly observed once in every sixty or one hundred years. Individuals observe their anniversaries annually. Once a year every successful business establishment takes stock of its position, notes its gains or losses, and, in the light of the experience thus gained, plans future operations. Every year boys and girls reach that period in life when they grasp the inner meanings and depths of things to which formerly they gave little or no heed. A nation should, therefore, devote time and thought to a suitable recognition and observance of its national day in each and every year in order that its significance and all that it really represents may be impressed upon the minds and engrained in the hearts of its youth.

This article is a plea, therefore, to the people of Canada that they should profit by the experience of a year ago, and that Dominion Day this year, and in each succeeding year, should be more generally observed than was the case prior to last year. True, it is not possible that such annual observance on the scale of the Dominion Jubilee celebrations, but Dominion Day can be observed each year in something more than the rather perfunctory manner which prevailed in most places prior to 1927.

It is gratifying to note in the columns of the weekly papers of Western Canada that steps are being taken in an unusually large number of communities to again fittingly celebrate Dominion Day this year. But the number of such places could be largely increased, and it is earnestly to be hoped that in those communities where, as yet, no definite action has been taken to organize citizens' committees for a proper celebration of Dominion Day, 1928, no further time will be lost in taking such action. It is a duty we owe to the growing youth of Canada that they be taught to observe the natal day of their country, and that through observance of Dominion Day a true love for and pride in Canada be developed.

## International Conference Held At Regina

Third International Wheat Pool Conference To Be Held Soon  
The Third International Wheat Pool Conference will be held in Regina on June 5, 6 and 7 next. For the first time, representatives from co-operative organizations other than those engaged in the marketing of grain will be present. Various produce pools as well as consumer's co-operative organizations from several parts of the world will be represented at the Conference. Last year's conference was held in Kansas City, Missouri.

### Bringing In Settlers

During the first four months of the present year the Canada Colonization Association was responsible for the settlement of 224 families on 46,207 acres of land.

A new glass substitute is translucent and weatherproof and admits the ultra-violet rays of the sun. Its chief advantages are its flexibility and unbreakability—it is used in rolls and by the yard.

## Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Winnipeg Flying Field

Winnipeg Flying Club Expect To Have Finest Field In Western Canada

A flying field which, when work on it is completed, is expected to be the finest in Western Canada, has been secured by the Winnipeg Flying Club. It will be ready for the operations of the club shortly when two Moth planes will be received from the Dominion Government and the organization will start its summer flying. The field is 135 acres in extent, high and level, in St. James municipality. Hangars capable of housing half-a-dozen planes will be constructed and an imposing club house will be built on the Sackville St. side of the aerodrome. It is also planned to lay out tennis courts on the aerodrome for the use of the members and their friends. Half a hundred men, many of them war fliers, have already taken active membership in the club and the number of associate members is growing daily.

## SAME SYMPTOMS

### IN MANY CASES

An Anaemic Condition Easily Recognized—Calls For A Blood Builder

In most cases of anaemia the symptoms are almost the same. The sufferer grows pale and is easily tired after the least exertion. The appetite is feeble and the patient loses in weight. Sometimes there are headaches, and often inability to sleep well. As the blood becomes thinner the symptoms become more pronounced and often there are fainting spells. All this shows that the blood is thin and watery, and at the very first symptom of this condition the patient should take Dr. Williams' Pink Pills, the most reliable blood-builder and nerve tonic known. The sole mission of this medicine is to enrich the blood, and when that is done all the distressing symptoms disappear. Among those who have reason to praise this medicine is Mrs. M. E. Patterson, Shanklin, N.B., who says: "About four years ago I became very much run down, I could not sleep nor rest, and I grew so nervous that the smallest things would annoy me. Eventually I grew so that I could not get on my feet to move about without help. I was just a miserable wreck, and became very much discouraged as I had tried many medicines which failed to help me. In this wretched state a friend urged me to try Dr. Williams' Pink Pills. I did so and before long found they were helping me. Gladly I continued taking the pills until I fully regained my health and strength and have since continued in the best of health. Later my daughter became anaemic and six boxes of the pills restored her to health, strength and color. Naturally I consider Dr. Williams' Pink Pills a blessing to weak, run-down people."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Appointed Danish Consul

H. P. Madsen Will Represent Danish Government In Northern Alberta  
H. P. Madsen, of the Edmonton City Dairy, has been appointed Danish Consul for Northern Alberta, with headquarters at Edmonton. Increasing Danish settlement, estimated at 5,709 in 1927, is given by the Danish Government as the reason for the establishment of the consulate. The territory will likely extend from Red Deer north.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies stands upon a reputation founded in the hearts of thousands who have known its benefit.

## British Army Men For Canada

Will Arrange To Place Demobilized British Soldiers On Land Here  
Col. J. H. Stubbard, Commandant of the British Army Training Centre at Chislehurst (Wiltshire), England, is now in Canada planning to draft out many numbers of demobilized British Army men to Canadian farms if satisfactory arrangements can be made with the Government and other organizations. Up to the present most of these men have gone to Australia, the Colonies states, where they have done splendidly. The course of farm training is thorough and begins six months prior to actual discharge from the army.

People of 65, according to a British M.P., don't go to work for the love of it. Other people who likewise don't go to work for the love of it are those of 25, 35, 45 and 55.

If ignorance is bliss, why isn't there more happiness in the world?

Minard's Liniment for Insect Bites.

## OUR MERCHANT MARINE

Renderers An Important Service To People Of Canada

The annual report of Canada's Government Merchant Marine by no means justifies those critics who hold that the ships are an enormous and useless drain upon the Treasury and that they should be sold. It is true that there was an operating loss in 1927 of \$720,000 as against \$50,000 in 1926, but, on the other hand, the improvement over the 1925 showing was more than \$200,000, and almost \$700,000 over 1924.

The past year was not a good one for shipping, no matter how operated. There was a shortage of cargo tonnage, this producing increased competition which resulted in reduced freight rates. "During the latter months of the year," says the report, "the volume of traffic moving from Canada to the United Kingdom became reduced, with the result that earnings of steamers trading to the United Kingdom were seriously lessened."

With brighter prospects for 1928, the next annual report of the Merchant Marine may well be of a more cheerful character. Nor must it be forgotten that, apart altogether from deficits or surpluses, the Merchant Marine renders an important service to the Canadian people. It undoubtedly provides traffic for the Canadian National Railways; it advertises Canada abroad and it is a measure of protection for Canadian exporters from private shipping lines.

It is possible, of course, to pay too highly for such things; but, having regard to all existing conditions, and in view of future prospects, the time would hardly seem to have yet arrived when the Government could sensibly dispose of the ships of the Merchant Marine—especially at existing prices.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. One bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

## Aeroplane Service For West

Expect To Establish Flying Service Between Winnipeg and Pacific Coast

With the ultimate object of establishing an aeroplane service between Winnipeg and Pacific coast cities, the Western Canada Airways Limited has purchased the Pacific Airways Limited, Vancouver. Plans have already been made to extend the activities of the Pacific Company to take in part of Alberta and a larger territory on the seaboard.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

## Hat Brings High Price

One Of Napoleon's Sold Recently For Fifteen Thousand Dollars

One of Napoleon's hats, a well-worn specimen, has been sold at auction for \$15,000. The hat will not leave France, since it was announced that the purchaser was a French army officer. The hat, in the shape made famous by Napoleon, was accompanied by a certificate guaranteeing that it had been sold by his valet in 1814 to an old clothes man.

For Rheumatism use Minard's Liniment.

A London vicar has proposed the charging of an extra fee of \$1.25 for weddings where confetti is used, to pay for the extra work of cleaning afterward.

Shanghai's largest hospital uses only a pound of morphia a year.

## Mechanical Man Is

Assistant To Doctor

Administers Anaesthetic In Exact Amount Required and Mistake Is Impossible

The Toronto Mail and Empire recently published the following special dispatch from Baltimore, Md.: "A Robot, or mechanical interne, believed to be the first of its kind in the world, has been devised by a professor at the University of Maryland for use in the medical and surgical field."

This machine, called an automatic anaesthetizer, was invented three years ago to be used in connection with experiments being conducted by the Department of Pharmacology. Not only does this new Robot do away with the necessity of having a special doctor, nurse or orderly to administer the anaesthetic during operation, but it also prevents an under or over-dose, and uses the exact amount necessary to keep the patient in total unconsciousness.

"The general principle of the machine is based upon the variation of pressure in the lungs of the patient during respiration. Danger of fatality is held impossible."

## Will Have To Wait

A native of Poland, for some time a resident of Oshawa, Ontario, went into one of the railway ticket offices there recently, and wanted to know if he could get a cut rate on one of the "seaplanes crossing the Atlantic." He was told to come back later.

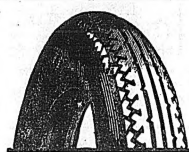

The salaries and wages in Canada's forest industry total annually about \$100,000,000.

Peevish, pale, restless, and sickly children—on their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

## For a City Beautiful

To make Ottawa second in beauty to none of the capitals of the world, is planned in a measure which proposes the expenditure of \$200,000 annually for 30 years, with an immediate outlay of \$3,000,000. One of the principal features of the improvement scheme, is the formation of a large central park.

Among some Indian tribes of North America it is customary to cut the hair of widows and forbid them to repair until their hair has grown again to its original length.

## A Tire For Your Every Need

Firestone Dealers offer you a complete line of tires, each supreme in its class, headed by the famous Firestone Gum-Dipped Balloons. All are made by Firestone in the world's most economical tire plants—an assurance of the most for your money.

Firestone distributes tires only through regular service-giving dealers direct from Factory branches and authorized distributors—never through mail order houses or so-called special jobbers.

See the Firestone Dealer nearest you. He is prepared to serve you better and save you money, no matter what price tire you want to buy.

## Here's How

## You Can Always Keep Your Farm Buildings in Good Repair

## GYPROC Advantages for Farm Buildings

Easy to use.  
Low cost.  
Workable as lumber.  
Cannot warp, bulge, crack, shrink or burn.  
Takes any decoration.  
Resists heat and cold.  
Vermine proof.  
Eliminates repairs.  
Protects your stock.  
Ideal for lining garages, poultry houses, barns, grain bins and other farm buildings.  
Especially suitable for converting attics and basements into extra rooms.

THOUSANDS of farmers have learned how easy and economical it is to keep farms up-to-date with Gyproc. Whenever repairs or alterations are required—whenever new buildings are needed—they rely on this famous fireproof wallboard.

For fast, economical, fireproof construction there is nothing to equal Gyproc. It cannot warp, crack, shrink, bulge or burn. Its million-celled cork insulation protects stock from cold, heat and vermin. Saves time, saves labor, saves fuel—the easiest to erect and most satisfactory Wallboard you can buy.

## Some Interesting Speculations As To What Future Holds For The Development Of Canada

Discussing the most recent estimate of Canada's national wealth, placing this at \$26,000,000,000, or \$2,700 per head of population, the Monthly Journal of the British Empire Chamber of Commerce observes that "to make comparison with the United States it would be necessary to multiply Canada's wealth by twelve" in order to equalize populations. This would give the Dominion an aggregate of \$300,000,000,000, a sum that does not differ greatly from the estimate of the national wealth of the United States made for 1925. The Journal sees reason to believe that the national wealth of Canada will expand at a rate its great neighbor "will find it hard to exceed from the percentage standpoint." While the respective rates of increase will naturally be a matter of strong interest a much more important consideration relating to the development of the Dominion can be found elsewhere.

This was touched upon recently by the New York Sun when it pointed out that Canada is in a position to profit, proportionately, more than the United States, from every advance made and to be made by science. Its industrialists and statesmen are so situated that they may guide their activities not only by the successes but by the failures of others; the untiring results of waste and wanton destruction, the possibilities of conservation and replacement of natural resources, are an open book to which chapters are added every day from experiment and experience. Machinery economically far more efficient than anything now known, devices today only speculatively projected as remote possibilities, transportation facilities that will make what we are pleased to call marvels seem clumsy and immature, wise legislation and enlightened practices; these headings suggest, but do not define, the advantages that will arm men in the future as they unlock the treasure house of natural resources.

What is true of development in Canada is true of every other land hitherto unexplored. Today there is no measuring stick by which may be even faintly suggested the stupendous potentialities of tomorrow's utilization of the earth and the fullness thereof by man if he exercises ordinary common sense. Canada, the New York paper pronounces, have given many exhibitions of possession of that endowment.

### Planting Seed From The 'Plane'

#### Reforestation Scheme Is Idea Of Large Pulp Company

Whole forests may spring up if the plans of a large pulp company to plant trees from aeroplanes are carried out this summer, as was forecast at a recent meeting of the Royal Canadian Institute. Grass seed was successfully sown from aeroplanes in the United States last summer, with the result that efforts will be made to sprinkle tree seeds from the air as part of a reforestation scheme in Northern Quebec. More than 250 square miles of forest a day could be planted if the project were feasible.

#### Dairy Factories In Canada

The latest returns show that the number of dairy factories in operation in Canada is 3,047. The total is made up of 1,209 creameries, 1,418 cheese factories, 334 factories making butter and cheese, and 20 factories making condensed and evaporated milk powders, etc.

**Western Honey Production**  
Manitoba and the other Prairie Provinces are increasing their production of honey much more rapidly than the eastern provinces, and last year they produced the biggest crop in their history, according to C. B. Gooderham, Dominion Apiarist.

"You say you live by the railway? Have you shares in the company?"  
"No. I make jokes about it!"—Lustige Koller Zeitung, Cologne.

W. N. U. 175

#### MADONNA AND CHILD

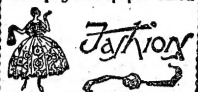

Sir Joseph Duveen has established a new record in the history of prices for paintings by giving \$875,000 for Raphael's masterpiece, "Madonna and Child," at an art sale in England. Sir Joseph purchased the famous picture from Lady Desborough.

#### Shipments Of Game Animals

Elk and Mountain Sheep From Wainwright Are Liberated In B.C.  
The British Columbia Game Conservation Board has just concluded two important actions in connection with restocking certain areas of the province. Twenty-five elk and one hundred Rocky Mountain sheep, donated by the Department of the Interior and taken from the herds in Buffalo National Park, Wainwright, Alberta, were liberated at points where these species had become thin and out. The elk in one shipment were set free at Spence's Bridge, near Kamloops, while the sheep, in two shipments of fifty each, were released between the Okanagan Valley and the Kettle River, and at Chase, B.C.

#### Winnipeg Newspaper Union

#### For the Larger Woman

The woman with a mature figure will appreciate Design No. 908 with its swathed neckline, slightly flared bodice and deep, open front finished with unusual revers collar. Inverted plaits and flared movement to hemline. Printed silk crepe in combination with plain harmonizing crepe is pictured and is a smart choice for street. Printed sheer crepe, a little more dressy, is also adaptable. Crepe satin, wool georgette and faille crepe are serviceable. Pattern in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. The 36-inch size requires 3 1/2 yards of 40-inch material with 1/2 yard of 20-inch contrasting. Price 25 cents the pattern.

## WORLD TRADE IN NEWSPRINT PAPER

Canada's Exports Exceed Those Of All Other Countries Combined

According to the best data available the total export of newsprint paper from the different producing countries in 1927 was slightly more than 3,000,000 tons. Canada's export shipments accounted for over 60 per cent. of this total and the balance was contributed by some fifteen countries. Sweden, Norway, Newfoundland and Finland, each exporting less than 200,000 tons, were fairly closely grouped, while Germany and Great

Britain had the major shares of the remaining trade. The diagram is based on figures published recently by the Newspaper Service Bureau.

The Dominion's commanding position in this field of international commerce is, for the time being, beyond dispute, but it should also be a constant and effective reminder that the Canadian people have a greater business stake in forest protection and conservation than any other people in the world.

#### Shipped Himself C.O.D.

German Immigrant Discovered In Packing Case On New York Pier  
Equipped with his passport and a visa as a quota immigrant, and nailed into a packing case consigned C.O.D. to himself at a fictitious address in New York, John Phoenix, 19 years old, of Dusseldorf, Germany, who took this method of stowing away on a trans-Atlantic liner, was discovered only after he had been unloaded on to the pier in New York.

A checker, noting a loose board on the case, thrust his hand in to investigate, and Phoenix, without thinking, shook it. The checker ran down the pier shouting that he had been bitten by an animal. The box was opened and Phoenix stepped out. Phoenix was somewhat emaciated when he was found, and his first demand was for food. He explained that after he had received his visa he found he had not enough money to travel to the United States, so, with the help of a friend, he constructed the box. It contained blankets, a cord hammock, a five-gallon jar of water and a supply of sausage, pumpernickel and chocolate. While the ship was at sea he loosed a board and was able to get out and walk around, but could not find any additional supplies.

#### Will Represent Canada

Mrs. Edith Rogers, only woman representative in the Manitoba Legislature, and Hon. Peter Hennin, Minister of Labor in the Dominion Government, will represent Canada at the International Labor conference to be held at Geneva under the auspices of the League of Nations this summer. Mrs. Rogers has been notified by Rt. Hon. W. L. Mackenzie King, Prime Minister, of her appointment.

#### Distribution Is World Wide

British Columbia Has Record For Poultry and Eggs

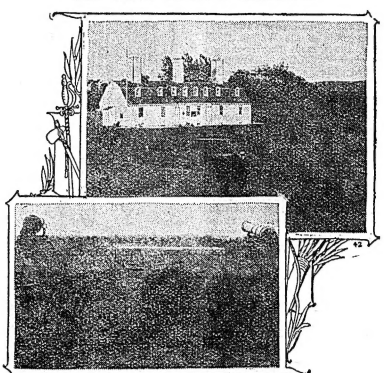

British Columbia has achieved a wonderful record for high-producing poultry and shipments are being made to "practically every country in the world." This is evidenced by the contents of one day's mail received by Prof. Lloyd, head of the poultry husbandry department of the University of British Columbia, which included letters from widely-scattered countries: From Japan, acknowledging receipt of hatching eggs, which had given good results; from several States in the Union, including Michigan, such as "those in the Zealand district, which turn out 6,000,000 chicks yearly, California and Illinois; Kentucky, regarding coxers for poultry clubs; private breeders in Connecticut regarding high-record stock; Havana, Cuba; England, for more pedigreed stock; batiches in Ontario; West China Union University.

#### To Locate In Winnipeg

Eastern Box Firm To Establish Branch Factory In Western City  
A firm which operates a large box factory in Toronto and a strawboard mill at Trenton, Ontario, is establishing a branch factory at Winnipeg at an estimated cost of \$1,000,000. Added to this is the development of a firm which will manufacture paper products from waste materials collected in Winnipeg with which wood pulp will be mixed.

Quotations in verse and colored illustrations decorate some of the German notes.

## OLD FORT IS NOW MUSEUM

1. Fort Anne, showing how the grounds have been made into a golf course. 2. The first powder magazine of Fort Anne, built in 1720.

It was in the year 1604 that the Annapolis Basin became known as "Port Royal"—the royal harbour—named by Samuel De Champlain, who was second in command to Timothee Pierre du Guast, Sieur de Monts, when he entered with a small battalion the sheet of water now known as the Annapolis Basin. The name finally attached itself to the surrounding settlement and was known as such until the British conquest in 1710, when the place was renamed in honor of Queen Anne, Annapolis Royal.

After a period of years the country was restored to France and D'Aumay erected the first fort on the present

site, about the year 1635. The foundation of one bastion of D'Aumay's fort is still to be seen.

The fort, after being burned and re-built on several occasions was finally left for all time, and not appearing to have any particular name during the French occupations, the articles of capitulation simply refer to it as the "Fort of Port Royal." Nor was any distinctive name given to it by Nicholson, but later it came to be known as Fort Anne. Today the fort houses a splendid museum, an object of veneration to the beholder—replete of history and romance and alive with memorable names and deeds.

## Canadian Mining Industry Appears To Be On The Eve Of Great Revival And Expansion

#### PRINCESS LICHOVSKY

Princess Mechtilde Lichowsky is not only a noted author but also an inveterate pipe smoker. She is the wife of the late Prince Lichowsky, who was German ambassador to England from 1912 to 1914. She is now a resident of Czechoslovakia and has numerous novels and plays to her credit as well as some verse and drawings.

#### Jewish Farmers Successful

Hold Million Acres In U.S. Worth Over Hundred Million Dollars

There is a steadily increasing drift of Jews to the farm lands of the United States, according to a report just issued by the Jewish Agricultural Society. In the twenty-eight years of its existence this society has fostered the back-to-the-land movement, and it has succeeded in inducing a large number of people to abandon city life for that of the farm. In 1900, when the society was incorporated, there was a Jewish farm population of 3,000 in the United States; at the end of 1927 some 80,000 Jews were tilling the land. It is estimated that they hold 1,000,000 acres and that their property is worth \$150,000,000.

"Our people are rarely thought of as tillers of the soil," said Gabriel Davidson, general manager of the society. "They are invariably associated with trade and industry, but there has never been a time since the Colonial days that there has not been a 'back-to-the-land' movement among them in the United States—an instinct which reaches back over 2,000 years.

#### Good Farms Competition

Offering Challenge Cup For Best Wheat Crop In Southern Alberta

A "good farms competition," confined to farms within a twenty-five mile radius of Calgary, will be held this year by the Calgary Board of Trade. Crops, farm buildings, gardens, livestock, and machinery will all be taken into consideration in making the award. A challenge cup will also be awarded the farmer on any part of Southern Alberta who produces the best crop of wheat.

#### What It Stood For

Sight-seeing Guide (on rubber-neck wagon): And, ladies and gentlemen, on your right you see a monument erected last year to a notable cause. Inquisitive Old Lady: And what does it stand for?

The Guide (sarcastically): Because, madam, it would look silly lying down.

The trout can move through water at the rate of thirty miles an hour.

"Mother, you remember the teacher who was ill?"

"Yes. Are you crying because he is dead?"

"No. He has recovered!"—Pete Mele, Paris.

With the development of the present century has also come the necessity of again revising the older estimates of the Dominion and of the place it is destined to hold in the world economy. Until comparatively recent years, even in the judgment of well-informed individuals, Canada as a habitation of civilized people comprised only a fringe of productive soil lying between the northern wilderness of ice and snow and the northern border of the United States. Nor has that view entirely disappeared on this continent, for it is still voiced occasionally by public men and the press of the Republic. Yet we who are privileged to live in this favored land know how wide of the mark that judgment was and how little it is in accord with the actualities of the present and still less with the potentialities of the future.

Even that other and more reasonable opinion that divided Canada roughly into an industrial east, three prairie provinces and the Pacific coast is no longer as true as it was once. Manitoba, classed as mainly a grain-growing region, is becoming an important manufacturing centre and is daily increasing its prospect of ranking at no remote date among the centres of the mining areas of the Dominion. Nor is there any sound reason for limiting mineral deposits to those already known, rather are the geological and metallurgical experts justified in their assurance that prospectors as yet have only done a little superficial scratching and uncovered but examples of the wealth that is buried in the ancient formations that form the crust of so large a portion of Canada from the Atlantic to the Pacific.

Recently the Department of Mines issued its preliminary report on the mineral production of the country for the value of the mineral output for 1927, at \$244,520,098, an increase of 4.69 million dollars, or 1.7 per cent. over the previous twelve months' record of \$240,437,123. The further statement is made that:

"New output records for all time were established in gold, copper, lead, and zinc among the metals, gypsum in the non-metal, and structural materials field. Values for natural gas and petroleum production also exceeded any recorded in previous year. Increased outputs, in comparison with totals for 1926, were noted in the figures for arsenic, cobalt, copper, gold, lime, manganese, platinum, zinc, coal, natural gas, petroleum, gypsum, pyrites, clay products, cement, limestone, sand and gravel."

Further expressions of the official view are contained in the annual report of the Department for the fiscal year ending on March 31, 1927, prepared under the supervision of Dr. Charles Camsell, Deputy Minister. After noting the expanding value of the annual Canadian output and the additions constantly being made to the areas under exploration, he pens this enthusiastic summary of the present position and future prospects of the mineral industry. In his own words:

"In addition to the extent of Canada's physical field for further development, which in itself furnishes a reasonable basis for confidence in the growth of Canadian mining, there are a number of other factors that have a vital bearing on the outlook. Great technical advances have been made in prospecting methods and in mining and metallurgical practice, and Canada is now better equipped in personnel for advancing in mining development. The intelligent interest aroused throughout the country in recent years is a force in itself, and as a result of the close relations existing between the universities, government departments, and the mining industry, the Dominion is gradually being better equipped with engineers, geologists, metallurgists, and other technical staffs. Through field and laboratory investigations and in other ways, both Federal and Provincial Governments are assisting in the work of mineral development. Moreover, the railway companies, banks, and other business interests have become deeply impressed with the importance of mining and are giving it a measure of attention already great, and likely to increase as development continues. It may, therefore, be said that there is behind the Canadian mining industry a strength of support which leaves little likelihood that the industry will fall to advance through any lack of competent business or technical backing."

Mary—"What would happen if I ate a worm?"

Mother—"It would kill you!"

Mary—"No, it didn't!"

## In difficult feeding cages

—when no food seems to agree with Baby—use Eagle Brand. It nearly always solves the problem.

## WORLD HAPPENINGS BRIEFLY TOLD

J. Ramsay MacDonald, Labor leader and former premier, will start on a holiday trip to Canada at the end of July. He will be accompanied by his three daughters.

Just to prove it can be done, two waters are hiking from Berlin to Geneva, 1,500 miles, wearing boiled shirts, swallowtails and patent leathers.

Field Marshal Moritz Aufenberg Von Komarow, one of Austria's most able generals during the Great War, is dead of heart disease. He was 76 years old.

Reports of a kind which usually turn out to be well founded are circulating in Paris that the Nobel peace prize will be awarded to Secretary F. B. Kellogg, this year, for his work in forwarding world peace.

The government intends to put in to force the long term farm loan act as provided by chapter 96 of revised statutes of Canada. Hon. Ernest Lapointe, minister of justice, stated in the House of Commons.

Argument by Dominion and the provinces on the questions respecting power and property rights on waterways before the Supreme Court of Canada has been deferred until September by a decision made by Chief Justice Anglin.

During the first three months of this year, the value of the mineral output of Ontario had exceeded the corresponding months of last year by a million and a quarter dollars, according to Hon. Charles McCrea, Provincial Minister of Mines.

British movies produced under the act which compels British exhibitors to show a certain percentage of British films will probably be shown throughout Canada. Twelve British films have been purchased for \$100,000 cash on account of bookings by the United Motion Picture Products of America.

### Hall Caine Is 75

Famous British Novelist Celebrates Birthday On Isle Of Man

Sir Hall Caine, novelist and dramatist, Greba Castle, Isle of Man, celebrated his 75th birthday recently.

Knighthood was conferred on Hall Caine in recognition of his services as a writer of propaganda during the war.

It is understood that Sir Hall Caine is now engaged in writing his own version of the life of Christ.

Shut your eyes to your virtues and open them on your faults; so will you have more virtues for other folks to see. Shut your eyes to other people's faults and open them on their virtues; so will you realize how good most people are.

## Is Champion Boy Orator

William Fox, Jr., Of London, Ont., Wins Oratorical Championship

Champion orator of Canada—William Fox, junior, of De LaSalle school, London, Ontario.

Second in oratorical honor—Miss Swanhild Mathison, Vancouver.

Third—Miss Alice Elizabeth Nune, Roblin, Manitoba.

The winner was presented by J. R. Burnett, of Charlottetown, with a ticket for a free trip to Europe as the guest of the newspapers and committees in the various provinces associated in this educational enterprise, and in the autumn he will represent Canada at the international contest to be held at Washington, with competitors from Mexico, Argentina, England, Japan, Cuba, Holland, United States, and Germany.

The "runners-up" got nothing out of their efforts but "glory." Each of the young ladies was presented with a huge bouquet of roses, as a mark of appreciation by the vast audience.

Frederick Holton, of Tavistock, Ont., last year's Canadian champion, was elected to be the first to congratulate Mr. Fox, but the lady competitors "beat him to it," and shoving their bouquets under one arm reached out and grabbed him with the other.

The instant the decision had been announced.

Nearly eleven thousand people jammed into the great arena at Toronto to listen to the final contest for the oratorical championship of Canada, under the auspices of Canadian newspapers, the Winnipeg Women's Canadian Club and the United Farm Women of Manitoba, with the Teachers' Federation of Ontario. Before the doors were opened at 7.30 long lines of ticket holders stretched out for several blocks in every direction.

The five contestants in the order of their appearance on the platform, were: Alberta, Miss Margaret Kinney, of Victoria High School, Edmonton.

Manitoba, Miss Alice Elizabeth Nune, of Roblin Consolidated School, Dauphin constituency.

British Columbia, Miss Swanhild Mathison, of Duke of Connaught High School, New Westminster.

Prince Edward Island: Edison Smith, of Pownal School, Pownal.

Ontario: William Fox, junior, of De LaSalle School, London.

Sir William Mulock, chief justice of the supreme court, presided as chairman, with Main Johnston, of the Toronto Daily Star, national chairman, as director. The judges were: D. M. Kennedy, of Peace River, Alta.; Rev. Donald Lambton, P.E.I.; Wilson Macdonald, of Lambert, Columbia; J. T. Thorson, M.P. for South Centre, Winnipeg, and Prof. George M. Wrong, of Toronto.

The timekeepers and scrutineers were, Walter Keast, S. H. Henry, of the Teachers' Association.

The decision of the judges was unanimous. The subject matter of each of the contestants all of whom spoke on the "Future of Canada," covered much the same ground. Miss Kinney, of Edmonton, talked under the great disadvantage of a severe cold which seriously affected her vocal powers and handicapped her eloquence.

Miss Nune, as she stood before the vast sea of faces, measured up to her task like a seasoned orator, but her voice was weak in so great an assembly, notwithstanding the amplifiers used to intensify the speaking.

She was clad in a plain navy blue middie, blue skirt with a red tie to harmonize with the braided collar. She evoked a spontaneous outburst of applause as she closed. Her touch of spirituality made her many friends.

Miss Mathison has a style that shined her to great advantage, and her subject matter was well selected and well treated.

Edison Smith, of Prince Edward Island was visionary, and original, but lacked style in delivery.

William Fox, London, Ontario, was easily the winner in point of subject matter, personal appearance, and delivery. The one thing he lacked was what is known as "punch" in public speaking. The spontaneous applause was the best evidence that the best man won.

Following the contest, W. D. Bayley, of Winnipeg, spoke. He tendered the thanks of the four provinces to the representatives of the co-operation and the splendid work of the Ontario representatives. J. T. Thorson, of Winnipeg also spoke, as did Dr. James L. Hughes.

Messages of regret were received during the evening from Hon. W. L. Mackenzie King, prime minister, and Hon. R. B. Bennett, Conservative leader, who could not be present.

The practical farmer raises better crops than the theoretical one.

## Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

Continued.

Our first engagement on the following day was to visit Liverpool Cathedral, one of the most beautiful examples of modern architecture in Great Britain and the largest ecclesiastical building in the country. It covers 100 feet long and will take in all 75 years to complete. It has now been building for 25 years. This wonderful cathedral is exceeded in size only by St. Peter's, Rome, Seville Cathedral, and St. John's Cathedral, New York. The style is Gothic and the building material red sandstone. The roof is of solid copper. It is the first cathedral to be constructed in the northern counties for 600 years.

The memorial chapel to the men of the diocese killed in the War, is perhaps the most impressive and beautiful building. Here is to repose in a receptacle lined with pure cloth of gold, a book containing the names of 40,000 men of all creeds who gave their lives in the Great War. The volume itself has taken eight years to complete and has cost \$20,000. The chapel is ringed with the crests cut in stone of the various regiments. At one end is a "Window of Sacrifice" in which are depicted scenes of the great acts of sacrifice in history. Flanking the Holy Table, which is beautifully wrought in solid oak, are two life-size bronze figures of a soldier and a sailor.

The ceiling of the nave is the loftiest in the land, rising 118 feet above the floor and the stained glass window at one end of the nave is the largest in the country. The organ has 48 stops and 10,500 pipes, and is electrically operated. It cost £50,000 and is the biggest in the world.

We had a further much under the spell of the beautiful cathedral, that we had to hurry to keep our appointment with the Liverpool Produce Exchange, operated by the Liverpool Provision Traders' Association. It is organized for trading in pork products (bacon, ham, sides, and hams in pickle); in butter, cheese, eggs, etc., and is, therefore, directly interested in Canadian trade. Its dealings are spot and cash, except in pork which may be option or spot. Its largest option market is the largest in Europe. The actual trading is practically all done privately and a large amount by telephone. Considerable interest was shown in our visit by the members who gave us a cordial welcome.

A tour of the Liverpool Port Exchange and Auction was given to us. Each big brokerage firm has its own auctioneer. Dealers view the fruit before it is put up for auction, and during the actual selling may be furnished with samples as they require them. To facilitate this an elevator in the centre of the platform brings goods from the basement of each lot offered for sale. These may be left in boxes or spread out in large displays, and the actual selling may be conducted in order that all dealers may get a fair idea of the whole lot.

The auctioneers work at high pressure. Much trading is done by signal, and should the auctioneer miss a bid, as he occasionally does, the dealers express their displeasure by stamping. The auctioneer as a rule knows the name of every man in the pit. It is said that one man has sold as many as 15,000 boxes of fruit in 20 minutes and on one occasion a whole shipload was disposed of in a similar space of time.

Before leaving Liverpool, we had opportunity to discuss with representatives of the provision trade some of the problems in marketing Canadian produce in Great Britain, and gained valuable information as to the requirements of the British market in bacon, cheese, butter and eggs.

We were now due to leave for Manchester in the morning, and our coaches of the Globe Travel Company calling en route at the Walton Hall Piggery, the famous hog breeding centre owned by Lord Dursley, whose herd of large Whites or Yorkshires has won awards at the most important shows in Great Britain. Several prize boars were brought out for our inspection and we were shown the splendidly clean farrowing pens and some of the curly-tailed piglets. Individuals of this herd are shipped to breeders in South America, Italy, France, Hungary, Poland, Holland and Switzerland.

Manchester, Lancashire's greatest industrial city, although 35 miles from the sea, is the fourth on Great Britain. This has been made possible through the construction of the Manchester Ship Canal, by which ocean-going steamers approach the very doors of the city.

Within a radius of 50 miles of Manchester there are as many people as there are in the whole of Canada, and within a radius of 100 miles there is a population of some 2,000,000, more than half the population of England and Wales.

In such a great consuming area, and in such immediate environs, the importance of the Manchester market to all producers of food stuffs is at once apparent. It is for this reason that it was included in our itinerary. Its Smithfield Fruit and Vegetable Market covers six acres and is the largest of its kind in the United Kingdom. Other markets owned by the corporation cover 27 acres, and there are also provided, adjoining the Ship Canal, extensive lairages for cattle and cold storage facilities for storing chilled and frozen meats.

We spent the morning in looking over the fruit, vegetable and produce markets. The party was divided into groups with well informed guides, and was shown the produce in the market and the methods of carrying on business. From here we proceeded to the tobacco factory of the Co-operative Wholesale Society, where every operation in the making of cigars, cigars, plug, twist or other forms of tobacco was shown to us in detail and before leaving we were presented

with a substantial box of cigarettes and also one of cigars.

We next saw the buying room of the C.W.S., whose samples of products were spread out for our inspection, also samples indicating the standards which they required for their purposes. We next proceeded to lunch in the great Assembly Hall at the head offices of the society, where we were addressed by two of the directors, Mr. Bradshaw and Councilor Sutton, who told us something of the history of the gigantic movement which has grown from a small organization of 48 affiliated societies to one with over 1,200, and resources exceeding \$227,000,000.

(To Be Continued.)

## When Radio Is Expensive

Responsible For Lost Sleep On Part Of Devotees

Radio has saved the world \$20,000,000, says General Manager Sarrett, of the Radio Corporation of America. What is the value of the sleep it has cost the world?

There is no question but that that is one of the greatest troubles with the radio. It causes a awful loss of sleep on the part of its devotees.

Take a man and a woman who must be at work by 7.30 or 8.00 in the morning, who might after night stay up with the radio until 12 or 1 o'clock, and this form of amusement is expensive. The expense is not in actual dollars and cents at the time, but in lost rest, reduced energy and, in the end, a breakdown of health.

## Canadian Business Conditions Are Good

Report For End Of First Quarter Shows Business At High Level

At the end of the first quarter of the year Canadian business was moving on a higher level. Out of ten indicators of conditions reported by the Dominion Bureau of Statistics one is unchanged as compared with last year, and the others are all higher. Coal output remains at the same figure, while employment, pig iron, steel, bank clearings, car loadings, building permits, imports, exports and coke are higher, from one to twenty-eight points.

## Winnipeg Newspaper Union

Travels 120 Miles An Hour

A further stage of development of aircraft for coastal defence and navigation was reached when the Blackburn Ripon II, fitted with a 1,000-horse-power Napier-Lion motor, flew over the Humber river and dropped a torpedo weighing nearly a ton at an appointed mark in the presence of air ministry officials and American and other foreign attaches.

The machine accommodates an observer as well as a pilot and mounts a machine gun in the rear cockpit. It can fly more than two miles a minute carrying a load of 1½ tons, can climb to several miles above ground level at high speed, fly slowly at practically stalling speed and be controlled when actually stalled.

A demonstration of a new fighter, which until recently was on the air ministry secret list, also was given. It is a Lyncock single seater with a 200-horsepower motor and is an experiment to show that a really efficient fighter can be produced with less than half the motorpower normally used.

## SUNDAY SCHOOL LESSON

JUNE 3

JESUS FACING BETRAYAL AND DEATH

Golden Text: "Not what I will, but what Thou wilt."—Mark 14.36.

Lesson: Mark 14:1-42.

Devotional Reading: Psalm 22:1-5, 18, 19.

Explanations and Comments

The Announcement Of The Betrayal, verses 17-21. As Jesus and His twelve disciples were eating the paschal supper, Jesus suddenly said, "Verily I say unto you, One of you shall betray Me, even he that eateth with Me." With great amazement the disciples heard this startling prophecy. One of them, one of that little band of twelve who had so closely united with their Lord's, was to be guilty of so infamous a treachery!

"Is it of them, O Lord, as they questioned? The form of the Greek implies a negative answer, as if each one said, 'Surely it is not I.' 'Who hath said this? Each word of his own heart sounded each creek, surveyed each corner, but that there still remains the dark world of his own heart, 'I myself?' Thomas Fuller quaintly asks: 'The mood of the disciples was not that of self-sufficiency. They did not indolently shrug their shoulders, nor passionately affirm their loyalty. Nor did they ask, 'Is it Judas?' It is Andronicus! Each with heated breath murmured, 'Is it possible that it is I?'

This is the right attitude for every follower of Christ. We read all our Lord's words in this spirit, asking ourselves what they mean for us, how they apply to us.

"The Twelve, he that dipeth with Me in the dish," Jesus added. The dish was the one containing the sauce of the paschal feast. No doubt all were doing this, and the words only emphasized the treachery of the betrayer. To John, Jesus indicated that it was Judas, John 13:26. "For the Son of Man goeth (to His death), even as it is written of Him." The cross was ever an accident; the Lamb was slain from the foundation of the world. "But woe unto that man through whom the Son of Man is betrayed! good were it for that man if he had not been born." The last sentence is a proverbial expression for the most terrible destiny. "For he shall be thrown into the sea, and the thought of any deliverance however remote." "Dante's estimate of the turpitude of Judas' crime—'he shall be thrown into the sea, and the depths of the Inferno—is probably a truer expression of the horror of his fall, by the unphilosophical conscience than are the modern attempts to explain away his guilt.'"—Wm. A. Gris.

## DOMINION IS INVITED TO SIGN U.S. PEACE PLAN

Washington, D.C. — Expressing keen satisfaction that the British Dominion had been so favorably inclined towards the treaty for the renunciation of war which the United States Government proposed on April 13, 1928, as to wish to participate therein individually and as original signatories, Secretary of State Frank B. Kellogg has extended to Canada a cordial invitation to become one of the primary parties to the treaty for the renunciation of war which is now under consideration.

Secretary Kellogg's note on this subject was despatched to the Canadian Government through Hon. Wm. Phillips, American minister at Ottawa. An identical note has been sent to the governments of Australia, New Zealand, South Africa, the Irish Free State and the government of India.

The American note refers specifically to the treaty to outlaw war as an instrument of national policy, to which all the great powers have been invited to adhere.

No mention is made to a further proposed treaty to provide machinery for the arbitration of international disputes. This second treaty, in the case of the British Empire, would replace the Root-Bryan arbitration treaty, which is about to expire.

## Shows Regard For Dominion

Submission Of U.S. Peace Plan "Pretty Compliment," Says London Paper

London.—"Frank B. Kellogg, Secretary of State for the United States, has paid the British Dominion's pretty compliment in officially communicating to each of them the United States' proposal for a treaty for the renunciation of war before approaching the minor powers in Europe," says the Daily Telegraph.

"Of course the position of the Dominion is different from that of the minor European powers. On all big international issues and great international conferences since 1919 the British Empire has been represented by an Empire delegation, including delegations from all the Dominions.

"Still, Mr. Kellogg's gesture augurs a regard and friendliness for the Dominion which they and the Empire as a whole cannot fail to appreciate."

## May Not Be Nominated

Reported That Hoover's Chances For Republican Nomination Not So Good

Washington.—It is the well-founded fear in informed and influential Republican circles here that Herbert Hoover, prospective candidate for the Republican presidential nomination, cannot carry the country against Governor Alfred E. Smith, of New York, whose nomination as Democratic candidate seems assured, and this fear may eventually block Hoover's choice as party leader.

Hoover has identified himself with every policy of the Coolidge administration and is the popular Republican candidate. His nomination, however, is far from assured. The formal opposition to his candidacy within the party is fairly strong and well organized.

## Want Censor Committee

Toronto Men Would Have Books and Magazines Censored

Toronto.—At a conference between publishers, literary men and the police department to consider the advisability of appointing a committee to censor books, magazines and other periodicals against which complaints are made to the police it was decided to communicate with the Dominion Government and ask them to select a committee to act for the Dominion. If this cannot be done an effort will be made to appoint a committee here.

Memorial To General Booth

London.—The founding stones of the Salvation Army training college, which is to cost \$1,025,000, have been laid. The building is being erected at Denmark Hill, in the Southeast of London, as a memorial to General William Booth.

Sir Arthur Currie Ill

Montreal.—General Sir Arthur Currie is confined to his home here recovering from a slight illness. It is understood that Sir Arthur will visit Europe after McGill University closes for the summer holidays.

W. N. U. 1735

## Denies Dealing In Immigration Permits

Former Solicitor-General Declares Charge Is Wrong

Ottawa.—Hon. E. J. McMurtry, former Solicitor-General, denied absolutely before the parliamentary immigration inquiry that he had dealt in immigration permits for \$100 apiece as charged by Alderman M. J. Coldwell, of Regina, before the immigration committee.

"I was astounded and stunned to read in the papers the statements of Mr. Coldwell," Mr. McMurtry said. "I denied it and welcomed the opportunity of coming before the committee and clearing away the charge. I was glad to read the denial of the minister of immigration. What he said was true. I have had no dealings with Mr. Forke since he has been in office."

Mr. McMurtry explained he had been elected in 1921 from North Winnipeg, which was half foreign born. Many of these people wished to bring relatives to Canada.

"I assisted them, but I never charged them a cent," he said. The numbers had become so great that later on he had charged them telegraph costs and such things. Then he had turned them away.

The records of Mr. McMurtry's law firm of 1922 showed that seven applications had been handled by his firm, "in a strictly legal way."

The legal fees charged varied from \$15 to \$50. After his return to Winnipeg in 1926, four cases had been handled at fees of \$25 each.

## Frown On Sunday Labor

Alberta Will Take Steps To Enforce Lord's Day Act

Edmonton.—Attorney-General Lynburn is instructing the Commissioner of Provincial Police to notify all police detachments in the province that it will be the policy of the department to secure a wider and better observance of the law in respect to Sunday work.

The local police will be expected to co-operate with the citizens in maintaining respect for the provisions of the Lord's Day Act. Mr. Lynburn points out that under the extreme weather conditions that have prevailed at critical periods of the past two years, considerable leniency in regard to the Sunday law has been exercised, because a certain amount of Sunday work on farms was unavoidable.

He says that this is not, however, to be taken as establishing a precedent, and the law of the land still stands. An effort is now being made to appeal to the interest and good judgment of the general public in the direction of better observance of the day of rest.

## Endorses Peace Treaty

Kellogg Plan Would Make Armies Useless Says Ramsay

London.—When the great powers sign the treaty suggested by the proposals of the United States Secretary of State Frank B. Kellogg, the armies and navies of the world will shrivel up, Ramsay MacDonald, former Labour Premier, declared before the American Chamber of Commerce at a luncheon.

"Sign a multi-lateral pact outlawing war," said the leader of the opposition in the House, "and these false securities we have faintly trusted, these defensive armies which have never protected us, will disappear, because they are useless."

Mr. MacDonald described the Kellogg peace note as "this magnificent declaration of simple fact."

With one part only of the British reply Mr. MacDonald found fault — that regarding self-defence.

"When such a treaty is signed," he said, "self-defence becomes unnecessary and any aggressor immediately becomes an outlaw."

Japs Return Prisoners

Tokyo.—Advices from Tsinan, Shantung, say that after conference with the Nationalist authorities the Japanese agreed to return to the local Chinese police all prisoners and munition taken there in the recent trouble.

Another X-Ray Martyr

Rio Janeiro, Brazil.—Another martyr to the X-ray is dead. Dr. Alvaro Alvin began research in 1920 and notwithstanding loss of both hands continued his work until a few days ago.

## Thornton Will Serve On League Committee

President Of C. N. Railways Has Accepted Appointment

Geneva.—Sir Henry Thornton, president of the Canadian National Railways, has accepted an invitation to serve as a member of the League of Nations Railway Committee.

Major-General Raymond D. Candolle, former manager of the Great Southern Railways of Buenos Ayres, also has accepted an invitation to serve.

Montreal.—Sir Henry W. Thornton, K.B.E., chairman and president of the Canadian National Railways has accepted an invitation to become a member of the railway sub-committee of the advisory and technical committee on communications and transit of the League of Nations, it was announced here.

The sanction of the Federal administration to the acceptance of the invitation was given to Sir Henry by the Prime Minister and by the Minister of Railways and Canals.

As Sir Henry may not be able to attend some of the meetings, permission has been given to P. A. Clews, European traffic manager of the Canadian National Railways, located at London, to represent him when occasion requires.

## AWARDS ARE MADE COVERING WAR LOSSES

Ottawa.—Canadians have been awarded \$8,289,389.94 as war reparations against Germany in a report by Commissioner James Friel, K.C.

The total amounts include \$4,245,888.75 assessed in favor of the claimants, and \$2,042,520.59 representing five per cent. interest on all awards calculated to March 10, 1925.

Claims dismissed by Commissioner Friel totaled 150 and involved \$21,556,846.03. Eighty-seven claims, totalling \$4,391,544.40 are dismissed in the report with the notation "no action, claims withdrawn, or not pressed, may be considered dead."

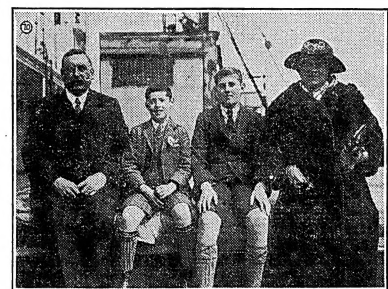

The records the report states, cover loss of life and property on the British ocean liner Lusitania sunk by a German submarine off the coast of Ireland on May 7, 1915; on the Hesperian sunk by enemy submarine September 4, 1915, and on other passenger and merchant vessels; merchandise lost on ships torpedoed; claims of fishermen and owners of fishing vessels sunk by submarines or raiders; claims for property destroyed in enemy territory; interment claims; claims of insurance companies for war losses; air raid claims; claims of ship owners and charterers; claims in respect to nurses and soldiers in hospital ships sunk; claims in respect of the Halifax explosion and other miscellaneous claims.

The awards of 1,613 claims dealt with range all the way from \$30 to \$246,000. The largest amounts are awarded under the headings of steamship losses, which include \$320,310 awarded the Canada Steamship Lines; \$346,000 to the Dominion Coal Company; \$300,000 to the Dominion Iron and Steel Company, and \$400,000 to the Nova Scotia Steel and Coal Company.

The T. Eaton Company, Limited, is awarded \$138,796.15 for merchandise lost on 19 vessels and goods seized at Antwerp. The total amount of this claim aggregated \$165,281.43.

Sentenced For Mail Theft

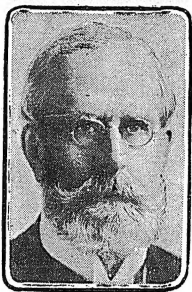

Toronto.—Charles L. Pettit, local postman, was sentenced to four years in penitentiary for the theft of letters from the mails.

## Scots From China

J. S. and Mrs. Calder are Scottish but their sons are Chinese if one is to derive nationality from place of birth. The passport problem was a puzzle but was solved in one way or another, for here they are "All aboard the C.P.S.S. 'Melita.'" J. S. Calder, senior, has resided in China for twenty-seven years and his sons spoke their native tongue before they learned English. They go to England to school.

## CHIEF JUSTICE OF ONTARIO

Right Hon. Sir William Mulock, chief justice of Ontario, who was chairman at the Canada oratorical championship held in Toronto, May 26.

## Says St. Lawrence Scheme Unnecessary

Report Given To Senate By Shipping Federation Officials

Ottawa.—"It is our firm conviction that as far as Canada is concerned the project is untimely and unnecessary," said A. L. W. MacCallum, manager of the Shipping Federation of Canada, to the Senate Committee on waterways with respect to the St. Lawrence project.

Mr. MacCallum assured the committee that the organization which he represented was concerned only with ocean shipping and that it was not wedded to any particular port or ports in Canada. It felt, however, that the immense expenditure on such a scheme as the St. Lawrence waterways could only be justified if it was proven that the benefits would be large.

The Federation had given special consideration to the matter and it has come to the conclusion that the expenditure at present was not warranted.

## Buys Another Airplane

Baron Huenefeld Now Owns Sister Ship To The Bremen

Albany, N.Y.—Baron Gunther von Huenefeld, banker of the first successful westward flight across the North Atlantic, has purchased the Juniper's plane Europa, sister ship of the Bremen, but what flight he plans in the new plane, are a matter of conjecture.

One report is that the German Baron, Captain Koehl, and Major Fitzmaurice, would attempt a return flight to Europe, having the new plane shipped to New York from Germany. Baron von Huenefeld, however, denies that such are his plans. He said it was possible that the plane would be shipped to Ireland, and that he and Koehl would fly it there to Germany, but that the plans were indefinite.

Honors Go To B.C.

Crescent Beach, B.C.—William Brankston, son of Mr. and Mrs. W. Brankston, of Nanaimo, a pupil of St. George's school, Crescent Beach, won a special prize awarded for geometrical drawing by the Royal Drawing Society of London. He took five honors and a pass for first place in the world, it is claimed, leading against 73,000 contestants.

Cost of C.N. Equipment

Ottawa.—The Canadian National Railway purchased \$56,024,210 worth of equipment in Canada from 1923 to 1927, inclusive, it was stated in reply to a question in the House.

## Gives Life To Aid Science

Doctor Studying Source Of Jungle Fever Succumbs To Disease

New York.—An expedition into Africa in an attempt to discover the relation between South America and African yellow fever resulted in the death of Dr. Hyodogo Noguchi, of the Rockefeller Institute for Medical Research, the institute was advised.

Dr. Noguchi, discoverer of the source of South American yellow fever in 1916, died at Accra, West Africa. Recently he wrote to New York friends that he had been stricken with African yellow fever and had been in an African hospital from December 28, 1927, to January 9, this year.

He said his own was the first case of the disease to come under his observation and that from his bed he had directed the inoculation of a monkey with some of his own infected blood. The animal died 12 days later and additional experimentation, his letter said, disclosed the micro-organism responsible for the disease.

## Coarse Grain Payment

Saskatchewan Coarse Grain Pool Making Second Interim Payment

Saskatoon, Sask.—A second interim payment amounting to \$730,361 is being mailed to members of the Saskatchewan Coarse Grains Pool. This represents a payment of 8 cents a bushel on all grades of oats except a few very low grades; and 10 cents a bushel on all grades of barley, flax and rye. This brings total payments to growers by the Coarse Grain Pool for the 1927 crop to the value of 53 cents a bushel for 2 c.w. oats, 75 cents for 3 c.w. barley 1 n.w. flax, \$1.75 per bushel; and 2 c.w. rye, 95 cents per bushel basis Port William.

At 2.30 a.m. the return flight was begun, the dirigible following the 24th meridian to the half way point about 300 miles from the pole and then turning for King's Bay.

General Noble had planned to land several men at the pole to make observations, but the messages received at King's Bay indicated that this part of the plan had not been carried out.

## Takes Responsible Position

Lindbergh Given Full Charge Of Big Air Scheme

New York.—Col. Charles Lindbergh, who has been out of a regular job since he quit the air mail service more than a year ago to fly from New York to Paris, has gone to work for the Trans-Continental Air Transport Corporation.

Lindbergh's new position is a "full time job," his employers said. As chairman of the corporation's technical committee, the famous aviator will have charge of selecting air planes, motors, safety devices, routes, and flying schedules for the new coast to coast air mail service.

It is up to Lindbergh to say how soon the new 48-hour passenger service between New York and San Francisco can begin. The colonel already has given some time and considerable thought to the problems of his new job and it is believed the service may be inaugurated within six or seven months.

Four other aviators will serve as Lindbergh's fellow committee men. C. M. Keys, president of the transport corporation, who announced the signing of Lindbergh, said the colonel's aides on the technical committee would be men "of long experience and proved ability."

## Alberta Forest Fires

Fire Raging On Both Sides Of The Athabasca River

Calgary.—Fire is raging on both sides of the Athabasca River where it joins the Slave River at Smith, divisional point of the Edmonton, Dunvegan and B.C. railway, a telegram informed the Calgary office of the Dominion Forestry Branch.

J. R. Hall, supervisor of the Lesser Slave National Forest, is in charge of fighting the fire. It is not in the National forest but in the near vicinity.

T. P. Biegan, district supervisor of fire protection, said that the fire hazard in the whole Northern portion of the province was dangerously acute owing to last year's growth of rank grass and absence of rain to any extent so far this season. No damage has been reported.

In presence of the weather continued it will be very difficult to keep the fires under control," Mr. Biegan said.

Send Ship For Bremen

St. John's, Nfld.—The steamer Sagona, which left Humbertmouth, Que., will endeavor to reach the scene of the Bremen, stranded on the Quebec-Labrador coast, if the famous monoplane can be salvaged. The Sagona will bring it back to Humbertmouth. The Bremen was seriously damaged when it attempted to take off from Labrador, recently.

Many Dead In Mine Disaster

Mather, Pa.—The ill-fated Mather mine scene of a disastrous explosion, continues to give up its dead. The known death toll reached 82 and mine experts said that all other missing men numbering 115 would be added to the list of dead.

## DIRIGIBLE ITALIA MAKES FLIGHT OVER NORTH POLE

King's Bay, Spitzbergen.—Coated with much ice and fighting a strong southwest wind, the dirigible Italia was slowly making her way back to her base at King's Bay after a brilliant flight to the North Pole.

Gen. Umberto Nobile, successful in his second dirigible flight to the top of the world, sent three historic messages from the Pole, one to Pope Pius, telling the pontiff that he had dropped the oaken cross entrusted to him on the North Pole from the Italia, and the others to King Victor Emmanuel and Premier Mussolini.

While over the Pole the flags of Italy and Milan and various other souvenirs were dropped. The cross, which was about eight feet high with a metal base, had a repository in which was placed a message written in Latin by Pope Pius.

For two hours the dirigible cruised over the pole, reaching that spot at twenty minutes after midnight, nineteen hours and forty minutes after leaving King's Bay.

At 2.30 a.m. the return flight was begun, the dirigible following the 24th meridian to the half way point about 300 miles from the pole and then turning for King's Bay.

General Noble had planned to land several men at the pole to make observations, but the messages received at King's Bay indicated that this part of the plan had not been carried out.

Mather, Pa.—The ill-fated Mather mine scene of a disastrous explosion, continues to give up its dead. The known death toll reached 82 and mine experts said that all other missing men numbering 115 would be added to the list of dead.

## Lowering Grades Of Wheat

Careless Methods Have Tended To Reduce High Western Standard

The best wheat in the world is produced by the soil and climate of Western Canada. Carelessness in farming methods and the encroachment of weeds have tended to reduce the grades of western wheat and this degrading will continue with serious effects upon the reputation of the west's wheat unless the farmers themselves adopt measures to stop it.

An old tale is told of a European municipality where the annual tax was paid in wheat. The grover brought their wheat to a common vat into which they poured it. One man said to himself that if he poured water into the vat it would not be noticed amongst so much wheat. But when the payments were completed the municipality found that the vat contained nothing except water.

The fable has its application to this province. The individual farmer may say that if he does not exercise care in his farming, if he allows weeds to grow and spread on his land and if he uses poor quality of seed, he will be able to do pretty well anyway and his comparatively small quantity of wheat will not much affect the general standard. But when many farmers act with a similar slipshod disregard for the reputation of Alberta wheat the total effect will be highly damaging.

The pure seed authorities of the province have taken this situation in hand and are vigorously endeavoring to induce the wheat-growers to adopt more permanently successful methods of production. The Calgary Board of Trade has actively co-operated in this work. Its standing grain competition aims in this direction. The Alberta Grain Company, Strong and Dwyer, the Canadian Malt Company, and other grain-handling companies, have awarded handsome prizes for high-grade wheat and clean farms. These efforts are certain to have a good influence. What is most needed is for the farmers themselves to realize the importance of stemming the prevailing tendency to a lower standard of wheat production, with the inevitable financial loss that this will eventually incur.—Calgary Herald.

### Good Rule For Success

Learn Job Thoroughly Before Trying To Boss It

Oliver Wendell Holmes, 87-year-old member of the United States Supreme Court, has a motto. He says: "Best is not the destiny of man." His right with equal truth say that a routine, day by day job, is not the destiny of man. Work, merely as work, is not the destiny of man. Achievement is something else. Mere idleness has little place in life, but change of work, change from routine, may have a very important place.

One of the best of short and simple rules for success is "learn every job before you try to boss it." It is pleasant to see a man promoted to higher office and to find he has studied the job that was ahead of him so carefully that he is thoroughly capable of being a boss. And nothing is more tragic than the tragedy of the unprepared.

### Deferred Payment

A Scottish Quaker coal-merchant saw a man stealing a large lump of coal from his yard. He stopped him with the remark:

"Dost thou know friend that thou wilt have to pay for this at the Last Day?"

The thief replied:

"That's long credit. I'll just take another lump while I'm at it!"

"So you are using balloon tires now?"

"Yes, they're easier on pedestrians."

"We want a car with comfortable upholstery."  
"Then you will have to have one made to measure."—Moustique, Charleroi

W. N. U. 1736

## Handicap To Egg Trade

Marketing Dirty Eggs Is An Undesirable Practice

That one of the most aggravating problems confronting the egg trade at the present time is the far too frequent marketing of dirty eggs, is the opinion of W. A. Brown, chief of the poultry division of the Dominion live stock branch. Farmers should realize, states Mr. Brown, that they can do much towards improving the egg industry by taking steps to prevent the production and marketing of dirty eggs and by discontinuing the very undesirable practice of washing eggs before marketing.

Under any circumstances, it is inevitable that a few slightly dirty or stained eggs will appear. But the farmer who consistently produces and markets large numbers of dirty eggs surely does not realize the bad effect of this practice on his market. These eggs are unpopular with consumers, and in many cities it is almost impossible to sell them at any price. Washed eggs are even more dangerous to the poultry industry than dirty ones. Washing destroys the natural protective bloom of the egg; the shell being damp, mould spores often enter, causing the egg to become unfit for food.

At the same time it is not difficult to prevent the production of dirty eggs. What is needed is an abundance of clean, dry litter on the floor, plenty of nests, about one to every six hens, clean straw in the nests and frequent gathering of the eggs.

### Should Work Both Ways

Tendency To Copy Others Could Help Instead Of Hinder

"Man is an extremely suggestible animal," writes a modern philosopher. "Many times he follows the suggestions of his eyes and ears and does his thinking afterwards." There is much truth in this statement. It explains why we spend too much money when we are playing with a lot of spenders, and perhaps say a lot of things we never mean when we are in the company of the gossipy and garrulous. We are just naturally "suggestible animals." "Copy cats" as the children often put it.

But it is a poor rule that won't work both ways. Why not make our tendency to suggestibility help us instead of hinder us? What is to prevent our associating with people who know the value of money, who are industrious and ambitious, and who are honestly concerned about the finest things of life? Why not turn that trait of suggestibility to good account?

### Eels As Table Delicacy

Many Tons Of Silver Eel Sold In Toronto Annually

Eels—like the species of lamprey that attached themselves to the swimmers in the lake marathon last summer, nor yet the conger eel, but eels none the less—to the extent of many tons come to many a Toronto table as food. The silver eel is sold by one dealer at the rate of 10,000 pounds a year. The few will not touch an eel. It is against his religious principles. Generally speaking, they sell at from 12 to 18 cents a pound, and are brought from Prince Edward Island, Quebec, British Columbia and Nova Scotia. The dealer said eels were palatable to taste when served up either fried or as a vealed jelly.

"Because of their healing qualities very often the eels are used in the treatment of sprained wrists."

### Bookkeeper Has Short Life

Average Length Less Than Other Occupations Says Doctor

Pity the poor bookkeeper. His environment is such that statistics prepared by Dr. J. M. Dodson, of the American Medical Association, show his life-span to be shorter than that of any other occupation.

Doctors, on the other hand, seem to find the business of keeping others healthy a boon to their own well-being and longevity. The figures show bookkeepers live to an average age of 36.5 years, doctors 62 years and the life of the average American citizen is given at 47 years.

Old Slow Poke: "Mister Jackson, er—that is, I would like to, er—that is, I mean I have been going with your daughter for five years."  
Old Man: "Well, whadda you want—a pension?"

Aerial mail pilots in transcontinental flights will soon have a radio that can be worn under their hats, according to an inventor.

"I understand some of your hens have stopped laying?"  
"Yes, two of them."  
"What's the cause?"  
"A motor car."

W. T. MOODIE, Superintendent of the Canadian National Railways, Port Arthur, Ont., who has been promoted General Superintendent at North Bay.

## Says Undergraduates

Should Not Think

More Successful If Solutions Are Accepted, Opinion Of Professor

Dr. Delton Thomas Howard, Professor of Psychology and Director of Personnel at Northwestern University, Chicago, expresses doubt whether it pays for American university undergraduates to think.

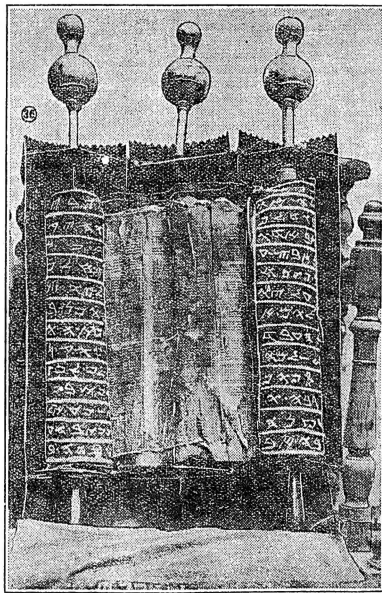

Under present educational systems he believes a student may be more successful by listening, and agreeing, recording, memorizing and reproducing. The undergraduate is required to accept solutions rather than make them, he said.

"The student's business is to learn rather than to think. He has not been asked to do good, competent, hard-headed thinking. Those who do think, do it under their own steam. Consequently most undergraduates are content to conform and obey. They mouth their lessons like Moslems in school, understanding little." Dr. Howard said mental muscles can be developed only if the university forgets much of its present organization. Creative work is what the student requires, he said.

### Widely Distributed Tree

The balsam fir is one of Canada's most widely distributed trees. It ranges along the Atlantic coast from Nova Scotia to Labrador, westward and northward through New Brunswick, Quebec, and Ontario to Hudson Bay, the Prairie Provinces to Great Slave Lake, and westward into northern British Columbia and Yukon Territory.

Customer—"Will you guarantee these seeds to grow trees?"  
Storekeeper—"Absolutely!"  
Customer—"Well, in that case I'll buy a hammock."

## See 2,000-Year-Old Scripture

Many are the strange and almost unbelievable sights witnessed by world tourists, such as, camels being shaved in Egypt, foreign pygmies, martyred monks that have been cast into moulds of plaster while alive and famous bronze Buddhas in Japan and China. There are others, perhaps, not so remarkable but hardly less interesting.

The passengers on the round-

## ASSOCIATION IS EXCLUSIVE

Only "Blood Donor" Can Qualify For Membership In London "Club"

A social evening was held in London recently by what is perhaps the most exclusive association in the world. For every single person present was what is called a "blood donor." A "club" without an entrance fee and without a subscription, the sole qualifications for membership is the voluntary giving of one's blood.

Up to a very few years ago, blood transfusion was an extremely rare operation. Today science has progressed, and hardly a week goes by in any great hospital without some patient's life being saved by the pumping into his veins of blood taken from another person. So there exists a branch of the Red Cross whose object is to find volunteers for the service of giving blood.

On applying to a hospital the donor is asked to allow a drop of blood to be taken from his or her thumb—for there are plenty of girls in the service. This blood is tested, and the donor's name recorded as suitable for particular cases. After that, all that he or she has to do is wait till the call comes.

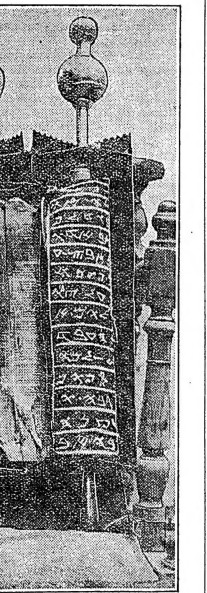

Day and night an office is open waiting for telephone calls from hospitals in need. A call comes through, and in a few minutes a message is on its way to a volunteer.

The volunteer feels no pain when the blood is removed, and within a couple of hours is as fit as ever. Indeed, there are doctors who say that an occasional giving of blood is actually good for one. But the fact remains—for the rest of his days the volunteer knows that he has saved a life!

### Sells Only Handicuffs

One of the queerest shops in London, and perhaps in the world, is located on the Strand, where an enterprising business man has established a considerable trade in the sale of handcuffs. The proprietor of the store claims to have customers from all over the world. The majority of his orders come from private insane asylums, theatrical companies, and passenger steamship lines.

The man who acknowledges that he is a chump has begun to acquire wisdom.

world cruise of the "Empress of Australia," one of the largest in the Canadian Pacific fleet, were given the privilege of witnessing an ancient Pentateuch roll containing two books of the Scripture dating from about the time of Christ and kept in a Samaritan chapel in Nablus, Palestine. This scroll is reproduced above from the photo taken by one of the tourists on this luxurious and educational cruise.

## MODEL RURAL HEALTH AREA

Efforts Are Being Made To Cope With Rural Health Problems

Following the establishment of county health units in a number of Quebec municipalities some years ago, and the inauguration of additional ones as rapidly as possible ever since, the announcement has now been made that the Rockefeller Foundation, co-operating with the Provincial Health Department, in Alberta, will shortly establish a model rural health area in that province.

Though the two types of organization differ in operation the reason for their establishment is identical.

It marks the commencement of a fairly general effort on the part of Canadian health departments and health officials to cope with the rural health problem.

Obviously, it is not possible, for financial reasons, to build up the same health machinery in sparsely populated districts as it is in the cities, yet modern methods for conserving life and health are just as important there as anywhere else. Even a full-time health officer is not usually a possibility.

With the county health unit, several districts are lumped together, and a central bureau established, staffed with experts, headed by a full-time health officer and including one or more nurses and a sanitary inspector.

The units in Quebec have brought about almost immediate reductions in the death rate and in the amount of infectious disease, throughout the districts which they serve.

While something similar, the model health area which is to be established in Alberta as an experiment, is somewhat more elaborate. It is to serve a district with a population of approximately 21,000, and its central point is a small model hospital with a surgical, medical and nurse.

So that where the unit is chiefly concerned with general public health problems, including education and the prevention of diseases, the model health area will specialize in treatment.

### New Bulletin Ready

Gives Practical Information On

Essential Work Production Of "Prices of hogs ranged from \$9.25 to \$9.75 per hundred for thick smooths, with \$1 per hog more for selects on a graded basis."

The significance of the latter half of the above sentence is often ignored, says a note from Dominion Department of Agriculture. The quotation is from a recent market review prepared by the Dominion Live Stock Branch and issued by the Department of Agriculture.

"Producers of bacon hogs are too often concerned with the scales, to the detriment of quality and market requirements."

"Feeders would do well to secure Circular No. 61 of the Department of Agriculture new series, entitled 'The Feeding of Swine.' In this Experimental Farm officials outline ration for the economical production of pork, in addition to valuable information of weaning, pasture, health and parasites."

The circular is ready for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa.

Where Work Is Systemized

No Lost Motion In Kitchen Of Large Hotels

The kitchen of a large hotel is an institution where lost motion is an unknown quantity. There is a woman who does nothing but prepare fruit cocktails but there are many other individuals who cut the oranges for them, slice the apples, the grapefruit, the cantaloupe and the pineapple. There is a chef in charge of broiled meats, another to prepare fowl. The man who polishes silver is not the man who washed it. There is a girl who does nothing but take things from ice boxes and hand them to waiters. One man does nothing but dish ice cream. Another does nothing but peel vegetables. A caterer and another is in charge of artistic cakes for special dinner parties. The young man who spends his entire day rolling butter balls can roll a thousand without feeling fatigued.

Original Survey Records

In the Record Office of the Topographical Survey Branch, Department of the Interior, there are on file over 54,000 different items in the nature of plans and original survey notes, being the returns from Dominion lands surveys since their inception in 1869.

"Have you a good landlord?"  
"Excellent. His only fault is an overwhelming curiosity; he is always asking me when I am going to pay my rent."

## Dehorning Young Cattle

Caustic Potash Method Is Best For Young Calves

Whether calves are to go into the dairy herd or to be marketed as beef cattle, experience has shown that they are more profitable for either purpose when dehorned. A man old cow carrying horns can give the more timid animals an uncomfortable time and indeed cause injury besides reducing the milk flow. But horns are equally objectionable in feeding steers. Not only do dehorned steers make better gains either in the feed lot or in the fields, but the absence of horns on a bunch of finished cattle usually adds from fifteen to twenty-five cents per hundred to their value. Buyers invariably prefer dehorned steers even for local slaughter as the carcasses are likely to be free from bruises and injuries.

While it is possible and practicable to dehorn large cattle, the operation is much more simply performed while still calves. An easy way to remove the horn described in pamphlet No. 15, of the Department of Agriculture, at Ottawa, "Dehorn Your Commercial Cattle," is by the use of caustic potash, and the best time is when the calves are but a few days old. Caustic potash is sold in sticks about the thickness of a lead pencil and may be purchased for but a few cents at any drug store. Up to the time the calves are about ten days old the horn is only loosely attached to the skull and may be moved about with the pressure of the finger. This is the best stage for the operation. The hair should be clipped off around the horn butt and vaseline applied around the edges of the hair after the clipping. This prevents the potash, when applied to the horn, spreading and injuring the skull. The caustic is moistened and rubbed on the horn surface four or five times, allowing each application to dry before applying the next. The calves should not be exposed to rain for at least a few hours after they have been treated, or the caustic will be washed off. If the dehorning is delayed until after the calves are two weeks old, it is necessary to remove the horns with a fine saw or clipper.

"Prices of hogs ranged from \$9.25 to \$9.75 per hundred for thick smooths, with \$1 per hog more for selects on a graded basis."

The significance of the latter half of the above sentence is often ignored, says a note from Dominion Department of Agriculture. The quotation is from a recent market review prepared by the Dominion Live Stock Branch and issued by the Department of Agriculture.

BY MELLIE L. MCCLUNG

Copyright, Canada, 1925

CHAPTER XXIV.—Continued

With the letter in his hand Jack sat looking at his polluted house—his poor desolate, violated house, the emblem of his own life. He had built this house with his own hands, lovingly, taking pleasure in driving every nail and fitting every board. And now—now—so it had been with his life—he had lived it cleanly, decently.

Try as he would, Jack could not believe that Helmi had forgotten him or been unfaithful to her marriage vow. If the worst he feared was true, it was some racial fault in her—Helmi had not sinned as an individual. What did he know of her traditions? He felt he knew her but little, although she was his wife. Nothing could alter that—she was his wife.

A dog came whinpering to the door. As Jack opened it the pale, cold, thin and miserable, barely noticed since old Sin had gone, looked timidly in at him. Jack recognized the animal—the crazy Englishman's dog, Mrs. McClung said the Englishman had stayed at his house six weeks before. Here was the proof, and this explained the letters . . . "Arthur Warner?" Jack had never heard his name. He had seen him though, a strange, uncouth, unshaven fellow.

Restraining a first impulse to drive the dog away, Jack coaxed her to come in, which she did, shivering. Her feet were sore, her nose hot. Jack went to the butcher shop and bought her some meat, which the hungry animal accepted gratefully. The dog was not to blame, whoever else might be.

The butcher told him about the dog. "The crazy Englishman had shot all his dogs but her. 'Cleo' is her name, and it seems he could not bring himself to shoot her. Old Sin looked after her until he got hurt and now, to go to the hospital, sure, you'll give her bones. It's real good of you to be provident for her. The Englishman wasn't any friend of yours either, was he?"

One resolve Jack arrived at—he must get out. He could not spend a

## Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen. The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Plugging the sleeve over the hand, attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Pilexer's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

W. N. U. 1735

In a place where you would not be pleased to find her."

"I don't care where she is—she is my wife, and I will never believe that she had done wrong unless she tells me so. I know her better than you do."

"I am sorry for you, Mr. Doran, and that is why I am so patient with you. This Milander girl has gone back to her old associates, the Chinese. She is in one of the all-night eating-houses. I suppose you know what it means when a white girl goes into one of these places."

Jack sat staring at him. "Who was your friend who saw her there?"

"I would rather not tell—it is not necessary that I should—and he wrote in confidence. He knew I was interested. She evidently tried to get the quiet life here—these girls crave excitement. There was some talk about her and the Englishman who owns the bungalow at English River. He stayed with her for a week before he enlisted. That is common talk at the mines. Men who are going out to fight, you know, like to take their fling."

He did not need to hurt his own thumb now—Jack Doran's face was enough. It had grown suddenly old and seamed and full of hatred. His nostrils quivered like those of a race horse.

He was about to go, but the magistrate waved him to a seat. "Mr. Doran, you were very indignant with me a year ago or a little less, when I dared to advise you. You were quite indignant and of course I am glad to admit your feelings at that time were very creditable, very creditable—mistaken, but creditable. Since then you have had a bitter lesson, a very bitter lesson. I did not harbor any ill-will; on the contrary, I was still ready to be your friend. I was your friend, even though you accused my friendliness." Col. Blackwood leaned over and his voice fell. "A man in my position does not expect thanks; we do not get thanks, but that is quite all right. We do not expect thanks, but I hope you see that I was trying to befriend you."

(To Be Continued.)

**It Will Relieve a Cold.**—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eucalyptic will relieve the bronchial passages of inflammation, soothe the inflamed throat and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

## Britain's War Library

Contains 40,000 Volumes and a Thousand Are Added Each Year

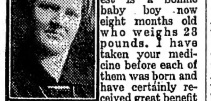

"London does not permit the more enduring work of its subjects," writes a correspondent in "John O'London's Weekly." "Those who labor for posterity do so in small studies, in little-known laboratories and in the quiet studies of private houses. So it is with the Library of the Imperial War Museum which is housed in what has been the outward summer of a select Queen's Gate mansion. This Library, which is the only British national collection of books devoted to the European War, will to unborn ages present a detailed diary of what was, when all is said, the greatest event in the lives of the present generation. Today, with the Library still in its infancy, it comprises already some 40,000 volumes and pamphlets. At least 1,000 volumes a year are being received, an inflow that shows no sign of diminishing."

**Manitoba Wheat Pool Elevators**  
A new elevator every two days has been the record established by the Manitoba Wheat Pool since building operations began this spring. Close to eighty new elevator points have been organized this year and new elevators will be erected at nearly all these points.

## "PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of which I have gained certainly received great benefit from it. I urge my mother to take it as I am sure they will receive the same help I did."—MRS. MILTON MC-MULLEN, Vanessa, Ontario.

For Hay Fever—use Minard's.

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package. 12W

## THE WALKING STICK

Appears To Be Doomed To Pass Into the Limbo Of Forgotten Things

The walking-stick, so long the symbol of the Englishman at home or abroad, apparently is doomed to pass into the limbo of forgotten things—or discarded things. A writer in the London Daily Express, after relating how thousands of walking-sticks are annually left in trains and street cars by absent-minded travellers, laments to be sold at auction with other unclaimed articles, decides that the day of the cane has passed.

A walking-stick, I suspect, hates to be the despised appanage of a generation which never walks at all, he writes. The heart of a walking-stick is broken as soon as it is born.

The first walking-stick was a branch wielded by the ape-like man or the man-like ape in self-defence. Its evolution through the ages is a waste worthy of Hazlitt or Lamb or Beacombe.

At least one volume would be dedicated to the Irish shillelagh. My first walking-stick was a black thorn which my father cut down for me out of a hedge in County Down.

Then came the memorable summer day when my father showed me my own blackthorn growing in a hedge. I begged him to cut it for me at once. "No, James," he said with a whimsical smile, "it will not be ready to cut until Christmas."

At least once a week we stealthily stole a glance at it, and always my smile least dimmed with delight in knowing that it was safe and secret. My father cut my blackthorn for me on Christmas day and dressed it for me with the skill of a craftsman.

Alas! We walk no more, and the walking-stick is a dandiacal ornament. It is anachronistic in this age, that despises Shill's mare.

But I comfort myself with the thought that there are still black-thorners in the hedges. Perhaps some day this train-borne, tram-borne, bus-borne, bike-borne, and motor-borne era will rediscover the rapture of tramping. Men may walk once more!

## Recipes For This Week

(By Betty Barclay)

**TOASTED RAISIN SANDWICH**  
½ cup chopped American cheese.  
½ cup nectars raisins.  
6 drops tabasco sauce.  
Bread.

Pump raisins, drain and chop, using a coarse cutter. Blend raisins with cheese and spread on thin buttered slices of bread. Put slices together as a sandwich and toast on both sides. Serve hot.

## VANILLA JUNKET ICE CREAM

(Two Quarts)

1 quart milk.  
½ pint cream.  
1 cup sugar.  
2 junket tablets.  
1 tablespoon vanilla.  
1 tablespoon cold water.

Mix milk and cream together, and warm to lukewarm—not hot, then add sugar and vanilla. Dissolve junket tablets in the cold water, add to the milk, stir well a moment, then pour immediately into the freezer can, and let stand in a warm room until firm—about 20 minutes. Place can in freezer, pack with ice and salt and freeze slowly to a thick mass, then finish freezing rapidly.

## Crossword Puzzle For Blind

For the blind, a crossword puzzle has been produced in Paris. It consists of a piece of stiff cardboard made of many lines of individual squares, in which the blind can "peg" letters that make up words. Squares marked by cross lines take the part played by the solid black squares of ordinary crossword puzzles. Directions are given in Braille printing.

**Canada Consumes Much Beef**  
At present Canadian consumers 85 per cent. of the beef cattle produced in the Dominion, the other 15 per cent. being marketed outside the boundaries of Canada, according to R. J. Speers, of Winnipeg, addressing the Alberta Cattle Breeders' Association.

For Hay Fever—use Minard's.

## Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

### PRE-NATAL DIET

There is a phrase respecting Motherhood "For every child a tooth"—which is to say that during the period of formation of the little life certain changes take place in the mother's teeth causing them to decay and be more easily lost. And this is so. But why?

For the rearing of the little structure that is so quietly proceeding, the little bone-builders, in their construction of the bones and teeth, depend chiefly on the calcium salts. Should the mother's diet be deficient in these building stones, the little workmen are obliged to go to the only other available sources of supply, the bones and teeth, to meet their wants. Robbing Peter to pay Paul—you will yet—yet the little structure must be reared at all costs. In such a case the mother's teeth are so structurally weakened as to invite disease. Not only to avert this disaster to herself, but keeping upmost the welfare of the coming infant, and remembering that she must contribute generously towards the influence that will make for normally developed teeth in her offspring, the expectant mother should select her diet with the utmost care. Hence she should choose plenty of lime-containing foods—milk, eggs, cereals, the leafy-topped vegetables and fresh fruits.

Following birth also, the demand for calcium in the mother's diet is still high since the infant feeds on her milk. If the mother's diet is not rich in calcium, the milk requires large amounts of these salts. An inadequate diet on the mother's part certainly affects harmfully her own teeth as well as those developing in the nursing child.

Moreover, it should be stressed that if the teeth are to be of good quality, the infant should at this time be naturally fed. The ravages of tooth decay have been found to be much greater among children who as infants had been artificially fed. The expectant mother should take at least a quart of milk a day in addition to her other food. This will ensure a proper start of the teeth in the jaws of the infant at birth and as well the proper bony development of the child generally.

## Little Helps For This Week

"One that prayed to God always."

—Acts x. 2.

Look up! look up! A Father's loving eye o'erlooketh all; Nay, more,—He all upholds, however small. Unknown to him a sparrow cannot fall.

Look up! look up!

—Anna Maria Sargeant.  
Ah! never forget that. Heaven reaches down close—quite close—to earth, so that whoever raises his head in a right manner, may see to find himself in Heaven with our gracious God and all His holy angels, even though our blind eyes cannot perceive them. Looking up is our strength.

—William Ellery Channing.

**Miller's Worm Powders** are the medicine for children who are often suffering from the ravages of worms. They immediately alter the stomach conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonics in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

## A reliable antiseptic—Minard's.

**Farming Prospects Are Good**  
Prospects for 1923's farming record are excellent. Sales of implement and machinery houses are far ahead of last year. It has been practically impossible to supply the demand for small tractors, dealers report, and with a fair crop, sale of combined reaper-threshers will be at least double that of last year.

## HERCULES

PERMANENT BUILDING PAPER

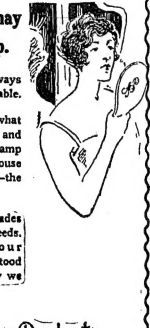

Beauty in a home may be only skin deep.

A beautiful home is not always comfortable nor easily saleable.

Hercules does for a home what beauty cannot. Tested and proven wind proof and damp proof, Hercules makes a home warm and dry at all times—the home that buyers seek.

Hercules comes in three grades—X, XX, XXX—for various needs. How Hercules fulfills our claims is easily understood after an examination. May we send a few samples?

Appelhof Paper Products  
HAMILTON, CANADA

## Fortnightly Crop Report

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, May 26, 1928.

Seeding of wheat is practically completed throughout the province and from forty to fifty per cent, of coarse grains have been sown, according to telegraphic reports received on Friday by the Department of Agriculture.

The reports to date indicate that there will be some increase in wheat acreage over that of 1927, largely owing to the amount of land summer-fallowed and newly broken last year. Quite a number of farmers are still holding some of their stubble ground in the hope that rain may come within the next few days, in which case wheat will be sown up to the first of June.

Much of the success of the present season's crop depends on rainfall in the near future, as precipitation during the month of May has been considerably below the average, and the prevalence of high winds over a large part of the province has greatly reduced the supply of moisture in the soil. A number of districts report that rain is necessary before satisfactory germination will take place, and in certain areas of lighter land losses from soil drifting are reported.

Early sown crop on summer-fallowed land, however, is doing well and is from four to six inches in height in many localities. The percentage of crop stubbled in this season is somewhat higher than usual.

In some southern districts the alfalfa crop is in need of moisture where irrigation has been delayed. A fair stand of sugar beets is reported, cutworms having caused considerable damage in some fields.

In the Peace River section the season is ahead of last year and the crop on summer-fallow is promising, but grain seeded on stubble land requires rain to ensure an even stand.

## Test Value of Phosphate Fertilizer

Experiments to test the value of superphosphate fertilizer for Alberta crops are being conducted at a number of points in the province this season under the direction of Field Crops Commissioner W. J. Stephen. This material which is a by-product of the smelters at Trail, B.C., is being supplied free of charge by the Canadian Pacific Railway. An increased yield in dry years of from three to five bushels per acre due to the increased root system developed, is claimed as the result of experience with this fertilizer in Australia and experiments carried out at various points in western Canada by the C.P.R.

Tests of the value of this material under Alberta conditions are being made at Bindloss and Winnifred under the direction of District Agriculturist James Murray, at points in the Lethbridge Northern Irrigation District by District Agriculturist M. L. Freng, at Sedgewick by District Agriculturist H. W. Scott, at Gleichen by J. McBain, at the Claresholm, Olds and Raymond Schools of Agriculture, at the Lethbridge Experimental Farm, on the Provincial Government Farm at Oliver, and in an area of burnt-off soil west of Edmonton. The work is being carried on with the assistance of a number of farmers in each of these districts, and it is hoped that some valuable information will be secured.

## Warning Issued Regarding Hogs

It has come to the attention of the Department of Agriculture that representatives of the Central United States Swine Company are working their way north and are now busy in the Blindman Valley, Stettler, Clive and elsewhere. They state that the Company has the permission and endorsement of the Alberta Government to carry on their work here. It may be pointed out that the company's officials have never called on the Alberta Department of Agriculture to discuss the matter of bringing a lard type of hogs into this province. They have, however, registered under the Foreign Companies Act, by reason of which they can do business. This permit was secured from the Provincial Secretary's Department and not from the Department of Agriculture. In order to secure a license, the chief things which the company is required to do are as follows: To appoint an attorney resident in the province; to give the location of its headquarters and statement of assets and liabilities. Under the circumstances the Provincial Secretary's Department has no option but to grant the license when application is made. It will be noted that the assets of this company are owned almost entirely in U.S. If it became necessary for any purchaser of Chester White hogs to enforce the terms of his contract with the company, it would first be necessary to sue in Alberta; a Canadian judgment, however, would not of itself be of much value without recourse to the courts of United States in an action upon such judgment.

The department does not approve of this breed of hogs coming into the province, as they are distinctly of the lard type, and provincial and dominion governments have been for years trying to encourage farmers to raise the bacon type hog because of the unlimited demand for bacon and the very limited and uncertain market for lard hogs.

The department does not approve of this company's method of selling hogs; giving an order for an animal without having seen it is not good business. Officials of the department have seen them at Coulters and report them a poor lot and many of them, including the boars, a very inferior bunch of pigs.

The price being paid for these pigs is altogether too high and the taking of these young gilts depends upon the ability of the company to organize other clubs and sell this stock again at a greatly advanced price. The contract states that the gilts will be taken back at a certain price if up to a certain standard. The question at once arises as to who will have the final say about this standard. It will undoubtedly be the company's officials. This is not something that can be determined by mathematical calculation, but is entirely a matter of opinion or judgment.

Farmers are advised to beware of being talked into a scheme of this kind, since if they wish to go into the breeding of pure bred hogs, first class breeding stock of the approved bacon type can be supplied by our Alberta breeders at a fraction of the cost paid for these hogs coming in from the United States. It may again be emphasized that the breed is not a desirable one for our province and the introduction of this inferior type will jeopardize the position of Alberta pork products on the export market, where a strong reputation has been carefully built up.

## Change in University Staff

A. E. Ottowell, who for the past several years has been head of the department of extension, University of Alberta, has been appointed registrar of the University, succeeding the late C. E. Race. Mr. Ottowell's place as director of extension work will be taken by E. A. Corbett, who has been connected for some time with the work of this branch.

The date of the cut off for the 1927 Wheat Pool is fixed for June 16. All who have wheat to deliver should see that it is in the elevators before that date. In past years members have gone past the cut-off date and complained they were not given sufficient notice.

## We want to know you better

THE church has a definite service to perform. Its purpose is to help humanity. It wants your help in its efforts to help others. We want to know you better. We want you to come to church next Sunday, shake hands, and say you are ready to help in the greatest work on earth today—the work of bringing the world to Christ?

## Trout and Salmon Await Anglers' Flies

With winter snows dispersing rapidly and ice dissolving into lakes and streams, with the rising of sap and budding of trees, memories of anglers awaken picturing streams where one would wish to fish, days

"When even the deep blue heavens look glad, and gladness breathes from the blossoming ground."

The waters of Nova Scotia, New Brunswick, Quebec and Ontario lure all their devoted followers waiting for the ice to disappear. These anglers are always eager to try new fishing grounds, and they will have new waters this year, according to Wm. Barber Haynes, visiting in "Outdoor Life and Recreation." The latest bid for the favor of the sportsman is the opening of part of that famous salmon river, the Restigouche, to any sportsman who can pay a sum for a day's fishing. Hereafter, it has been impossible for anybody to fish the Restigouche unless he rented fishing water for a term of several years. Now the province has made it possible for men in ordinary circumstances to put up money enough for the realization of anglers' dreams—a week's fishing for the salmon of the Restigouche in New Brunswick.

The season for salmon in New Brunswick is from May 24—September 20. In the Restigouche River and its tributaries, such fishing is permissible from April 1 to August 15 only; the limit is 20 per week. The salmon season in Nova Scotia is from February 1 to August 31. Quebec's trout streams are many and widespread, and are easily reached making them deservedly popular both with Canadian and American fishermen. Satisfying sport is to be had in the streams in the Lethbridge district north of Quebec City. The Province of Quebec has a wealth of attractions for the sportsman. No portion of

## REALIZATION OF WINTER DREAMS

the North American continent is more richly endowed with fish and game. The innumerable rivers, streams, lakes and great stretches of forest offer an almost bewildering selection to the man planning a hunting, fishing or canoeing trip. The trout season in Quebec province is from May 1 to September 30 for speckled trout, and from December 2 to October 14 for the lake trout.

Ontario's most celebrated trout country embraces rivers and streams north of Lake Superior whose names many anglers are already familiar with. In this section special bungalow camps are at your service, operated by the Canadian Pacific Railway, they afford every advantage of an outdoor life just slightly lightening the hardships especially for those who wish to have greater comforts than a tent and camp outfit affords. The season here opens May 1. Distant fields are always green, and distant streams appear more green, while pools grow darker as imagination pictures fishing days in spring.
